### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/541, 179 filed on June 30, 2005.

#### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

The information disclosure statements filed on June 30, 2005 has been considered.

#### ***Claim Objections***

Claims 1, 7 and 8 is objected to because of the following informalities:

-The reference character (34b) after "backward input gear" should be changed to (34a).

-The dependency in claims 7 and 8 should be changed from claim 3 to claim 6.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "capable of" raises a question as to the limiting effect of the language in the claim, (is the limitation for the sleeve optional?).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Honda et al ('203) in view of JP 3-364. Honda et al discloses a twin clutch transmission having a driving force from an engine transmitted to a first input shaft (X1) via a first clutch (C1) and to a second input shaft (X2) via a second clutch (C2), a plurality of pairs of shift gears arranged between the first and second input shafts and a first and second output shaft and a sub shaft (via MR) arranged parallel to the input shafts (Figure 1). Honda et al does not disclose teeth for a parking lock formed on a sleeve of a gear shifting clutch.

JP discloses a transmission wherein teeth (26) for a parking lock is formed on a sleeve (25) which engages an output gear (19) of a plurality of pairs of shift gears.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide one of the gear shifting sleeves of Honda et al with an integral park lock gear in view of JP to reduce the axial length of the transmission.

***Allowable Subject Matter***

Claims 1-5 are allowed. Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Ordo ('560), Akashi et al ('908) and ('063), Zenker et al ('364), Smith ('4830 and Ahrens ('013).
